

TISSUES I USED

OIKAWA YUINA

THE CATEGORY

ABSTRACT

I was very worried about what to symbolize when this task came out. And at the end of the trouble I found the tissue that was piled up on my bed. In the past, there were people who used “the chewing gum” as a symbol and I was inspired from it. Twenty-five sheets of tissue were gathered on the bed. The remaining 20 tissues were crumpled so as not to have the same shape as much as possible, and purposefully not to have their appearance. I noticed that there was a habit in the way to crumple a piece of tissue. When I took a picture of the third piece of tissue, I felt it looked like a goldfish. The reason why I added the picture instead of the symbol of only normal tissue is When I took a picture of the third piece of tissue, I felt it looked like a goldfish. Since then, all the tissues looked like something, so I drew pictures on the tissues.

SELECTED VISUALS

3

#37 Puppet muppet of horse which riding on Mt.Fuji

#29 Cow with a long jaw

#28 Mermaid in the sea

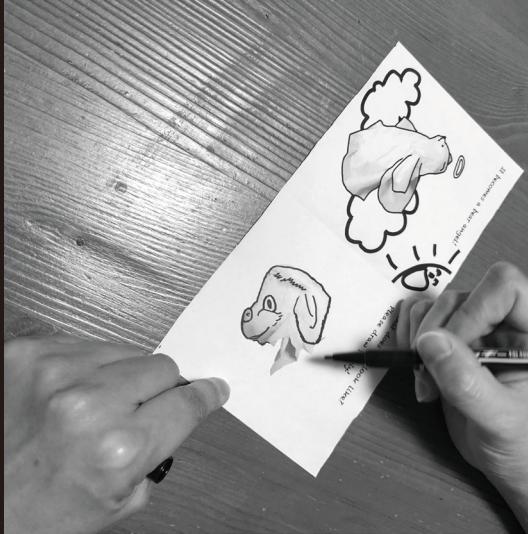

#27 Chicken face

#26 Angel of bear

ANOTHER WAY OF APPLICATION

I decided to make this tissue symbol a picture book for small children.

Put the unpainted tissue and ask child, "What does it look like? Draw freely." And on the next page, I put a symbol of the tissue I drew and put an example as "● ● became".

I thought to give small children imagination.

I think to make accessories as another way of application.

As this is a prototype, I am bad at that it, but I think that I would like to use UV resin like this.

DOCUMENTATION OF THE PROCESS

SHORT CV

5

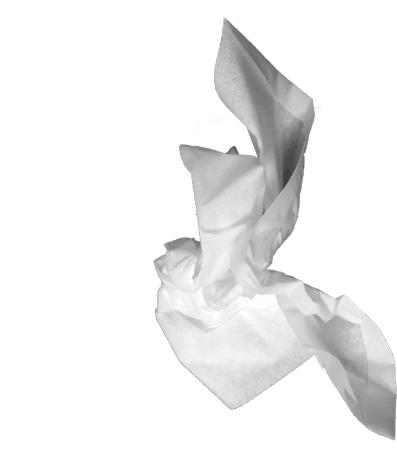

PROCESS

First of all, I collect 45 tissues that my nose bites. Next, take a photo of my favorite angles of 45 tissue. Import them to a computer and erase the background in Photoshop. Import them to my computer and erase and write out the background in Photoshop. Then I draw a picture with the illustrator's pen tool and write out and complete! I wanted to give it a strange name, but it's a shame that there are a couple of compromises where the name does not appear in the template.

SHORT CV

I am a second grader attending Doshisha Women's University Media Creation Department. I liked drawing since I'm a kid, and I entered this university. When I entered, I wanted to be an illustrator, but now I am interested in web designers..

**DOCUMENTATION OF
THE PROCESS
VISUAL IMPRESSIONS**

- 1,Take a picture of the tissues.
- 2,Change from color to black and white.
- 3,Make the background transparent in Photoshop.
- 4,Draw a picture with an illustrator.
- 5,Finish!
